

Make a cat scratch pad!

You will need:

Cardboard boxes (Thick corrugated board)

Duct or packaging tape

A cat

Cut large boxes lengthwise into strips 8-10cm wide.

Stack 5 to 10 strips and then roll them tightly along the full length.

Stick the strips onto the roll with the tape.

Repeat this on the outside of the roll until you achieve the desired width of the pad.

For some extra fun, sprinkle catnip into the spaces in the board.

This can be left on the floor or mounted on a door or chair leg.
