

## Edible Christmas snowflakes!

(Parrots, bunnies, guinea pigs and chinchillas)

### You will need:

Thin white paper (e.g. white paper bags from bakers)

Dried veggies, pellet food or dried fruit

A piece of thin sisal twine or a thin strip of fleece

Tear the paper into strips about 3.5cm wide and 15cm long – 3 strips per star.

Place a treat on the paper at one end of a strip and twist the paper either side of it.

Keep twisting the paper but add another treat in at the other end as well.

Once you have made 3 of these secure them in position with the sisal/fleece (make sure there is at least one wrap between each “branch”).

Hang up your creation where your birdy or fluffy can play!
