

Super fleece bone

Dogs love to throw, chase, pull and chew on these!

Cut Fleece into strips – the thickness and length can be adjusted according to the size of the dog.

e.g. 1.5cm wide and 15cm long for very small dogs or puppies.

Knot 3 strips together at one end, plait the strips all along and then knot the other end.

Voila!

Make simple fleece bones, knot a rope into a ball or make longer tug of war ropes with an additional knot or 2 for extra grip. These make amazing chews for teething puppies and heavy chewers. Unlike cotton ropes these will not damage your dogs teeth, and are far less likely to cause gut problems.

Extra tip! Bake thick slices of sweet potato (with hole in centre) till dry and pass one or more of the strips through the holes in the slices at intervals for extra chewable entertainment!
