

Guinea pig treat-kebabs

Something different for the little squeakers! These are super fun for bunnies too, and you can even make smaller ones for hamsters, rats and mice! Remember, too much of a good thing is not very good! Too much fresh food can cause gastrointestinal problems. Ensure you know that the fresh food you are giving is safe for your piggie in the quantities it is getting.

You will need:

Cubes/slices of cavie-safe fruit and veg.

A normal kebab stick (be careful of splinters and sharp ends) OR metal kebab sticks for pets .
Cardboard cut into blocks a little wider than the fruit.

Place small pieces of fruit and veg onto the kebab stick alternating fruit – cardboard – veg – cardboard to make it more challenging for the cavie to reach the yummys!

Serve!
