

## Hills Prescription Diet t/d Canine & Feline:

Hills t/d is a complete and balanced diet that has been specially formulated to support your dog's and cat's dental health. It has a unique kibble shape and size which helps clean the tooth surface using special fibre matrix technology, and contains no mineral abrasives or active chemicals. It is especially recommended for dogs that are prone to developing dental plaque, stain and tartar (calculus), Oral malodour and or inflammation of the gums. T/d is most effective when used on clean teeth – following an initial professional cleaning done by your vet. It could be daily treat and fed dry. Other dental home care methods can be done in conjunction with the diet e.g. regular tooth brushing with pet safe toothpaste. Hills Pd t/d is available in: Canine, Mini Canine and Feline option
