

Home-made foraging balls

A super cheap and easy foraging toy you can make at home for bunnies and other small fluffies, parrots and parrotlets, cats and even small dogs.

1. Cut toilet rolls into rings.
2. Place 1 ring over another in opposing directions.
3. For small fluffies or birds that will have fun destroying the board, stuff the ball with treats, hay (for fluffies), newspaper and other safe materials.
4. For a treat ball for dogs and cats do not close all the openings after placing the treats in the ball.
5. For some extra stimulation for a small fluffy or cat, put a small bell in with the stuffing.

Note: Dogs and cats cannot digest large quantities of cardboard - if they try to eat the board, this toy should not be used for them.
