

Foraging tubes

(Guinea pigs, rabbits, rats)

This is a simple “Hide the food” foraging toy which can be used for most small fluffies and parrots. You can use as directed or with some minor modifications depending on the species.

All you will need is:

- Toilet Rolls
- Your Guinea Pigs favourite Fruit and Vegetables cut into slices/pieces
- Crinkled up pieces of paper
- Hay – timothy, teff/Eragrostis/mountain hay (for healthy teeth)

Method:

- Stuff the inside of it with hay and some of the Vegetables/Fruit. Cutting a slit down the side of the toilet roll will make it more tempting for reluctant foragers.
- You can put crinkled up paper into the ends of the roll for more of a challenge.
