

## **Mess Free Litter Box!!!**

You will need:

A plastic storage box (approx. 70L) + lid

Dremmel or box cutter

File – not too coarse

Permanent marker

Something circular to trace (approx. 25cm diameter)

For top entry: Trace the circular objects outline onto the one side of the lid. Alternatively, for side entry trace the circle (or just a square) into the long side of the box – make sure you make it as high as possible or the litter will come through anyway!

Cut the circle (or square) out.

File off the sharp edges

Add litter to the box, close and present to your curious Kitty!
