

PVC foraging toy for dogs and cats

You will need:

30cm of 5cm pipe (or 20cm of 3.5cm pipe) – Depend on pet size

2 FIPT fittings to match the pipe size

2 cleanout plugs to fit the above materials

1.5cm (5/8 inch) drill bit and drill

Sandpaper

Drill about 5 holes in different areas (not too close to the ends)

Attach (if necessary, glue on) FIPT fittings to both ends.

Use sandpaper to smooth the edges of all the drilled holes and test with your finger for sharp areas.

Screw the cleanout plugs into the FIPT fittings to close the tube.

Add treats small enough to pass through the drilled holes.

You can modify this idea for chinchillas, rabbits and parrots!
