

Simple wooden block toy

This is a simple but fun toy for those wood-loving foraging birds!

You will need:

- A block of bird-safe wood (or a piece of a thick branch)
- Drill and bits
- Some sisal rope (if you use chain, beware of metal toxicity!)
- Small treats

Drill through the centre of the block of wood for a piece of sisal to go through so you can hang the toy

Drill small holes (or larger ones depending on what treats you use) all around the sides of the block. Stuff the holes with some of your feathery friends' favourite bird-safe treats.

Hang the treat in the cage or on a play-stand and let the fun begin!
