

Turkey Jerky for cats and dogs!

Left over turkey? Why not make your canine buddy some tasty chewy treats? These can take the place of rawhide chews for some dogs.

You will need:

Turkey

Baking paper and oven OR dehydrator!

For cats only – dried catnip.

You can replace turkey with skinned chicken breasts, boneless fish, or boneless red meat.

If you use left overs, please ensure you use the inner flesh, free of spices and sauces.

Preheat oven to about 100° C.

Remove any skin or excess fat from the meat.

Slice the meat approximately 4mm thick (will thin out when baked)

For cats you can then make strips of these slices.

Set the strips on baking paper – for cats, sprinkle some dried catnip over the meat.

Bake for 2-4 hours (depends on oven)

Make sure the meat is hard and dry before removing from the oven.

Serve!
